REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The monomeric cyanoacrylate adhesives of Quintero are so chemically different from the polymeric silicone impression materials of Wanek et al. that one of ordinary skill in the art would not have been motivated to apply the sterilization method of Quintero to Wanek et al. since there would have been no expectation of success. It is further noted that the prior art of record would indicate to one of ordinary skill in the art that the irradiation of polymeric impression materials would have caused crosslinking of the material. See Del Torto et al. (US 6,998,427), col.11, lines 44-51. This crosslinking would have been undesirable in unused dental impression materials.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
